National level data resources

Public perceptions on using non consented administrative data

Securing Trust: Data Controllers and Public

Data controllers opt in to each project

Worthwhile projects
Public Benefit, scientifically and ethically sound
& approved

Safe People

(approved
researchers)

Safe Data

(limited de
identified
data)

Safe Places

(secure
data
centres)

**Safe
Outputs**

(SDC prior
to release
of results)

Data controllers opt in to each project

Public Engagement and Communication

The 'Scottish Model'

- Facilitating research that is in the public interest whilst protecting individuals' privacy
- Avoiding large data warehouses but ensuring data can be brought together efficiently to answer important research questions
- Creating partnerships and networks across sectors (academia, public and commercial sectors).
- But not selling data or allowing commercial companies direct access to individuals' personal information
- Sharing resources and expertise to create efficient public services (Campbell Christie report)
