

# Exploring the role of R&D

*Adapted from the work of Dave Ulrich*

# Quality Expert

**Quality Experts** are uniquely qualified to help people navigate across the complexities of multiple research institutions and the NHS - and so facilitate faster, easier quality clinical research through ensuring high quality processes and outcomes

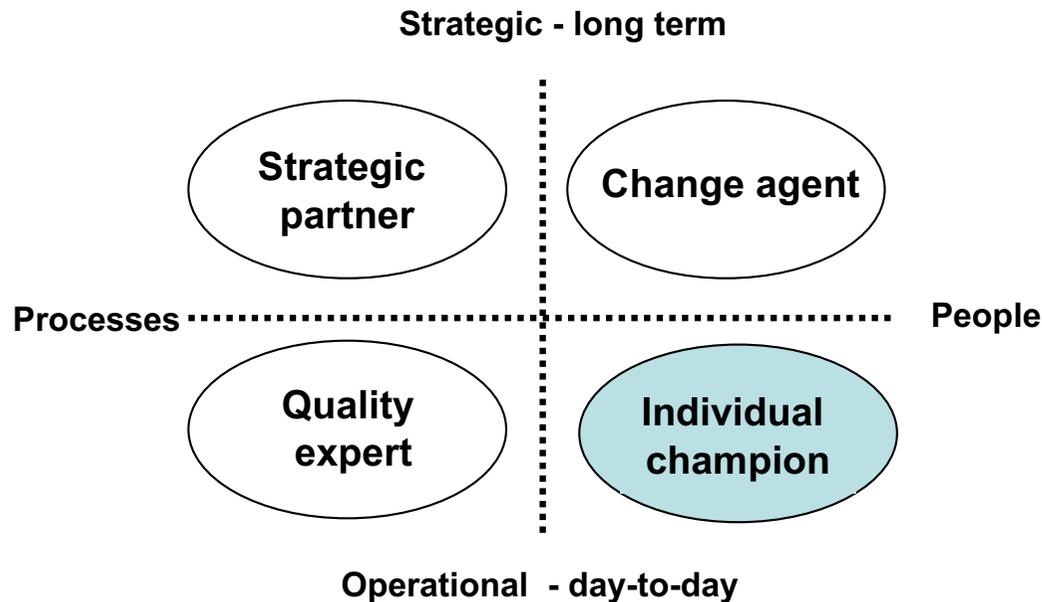

## Roles

- Thinks 'end to end': idea to publication
- Focus on processes and efficiency
- Seeks standardisation and measurement
  - Centralised and organised
  - Gate-keepers and auditors

## Skills

- Team leadership
- Process improvement
  - Attention to detail
- 'Nose' for deviations and deficiencies
  - Financial awareness

# Individual Champion

## Roles

- Close to individual researchers
- Emphasis on learning and action
- Advocacy on behalf of researchers
- Balancing demands and resources
  - Confidential and trustworthy
- Practical focus on making things work
- Educator about R&D processes and systems

## Skills

- Interpersonal skills, e.g. listening, curiosity, questioning, empathy
  - Coaching and mentoring
- Challenging and confronting behaviour
- Capacity to maintain adult-adult dialogue

***Champion of Individuals** are skilled at providing personalised support to researchers that allows important work (and researchers) not to get lost because of frustration, institutional inertia or loss of nerve*

# Strategic Partner

## Roles

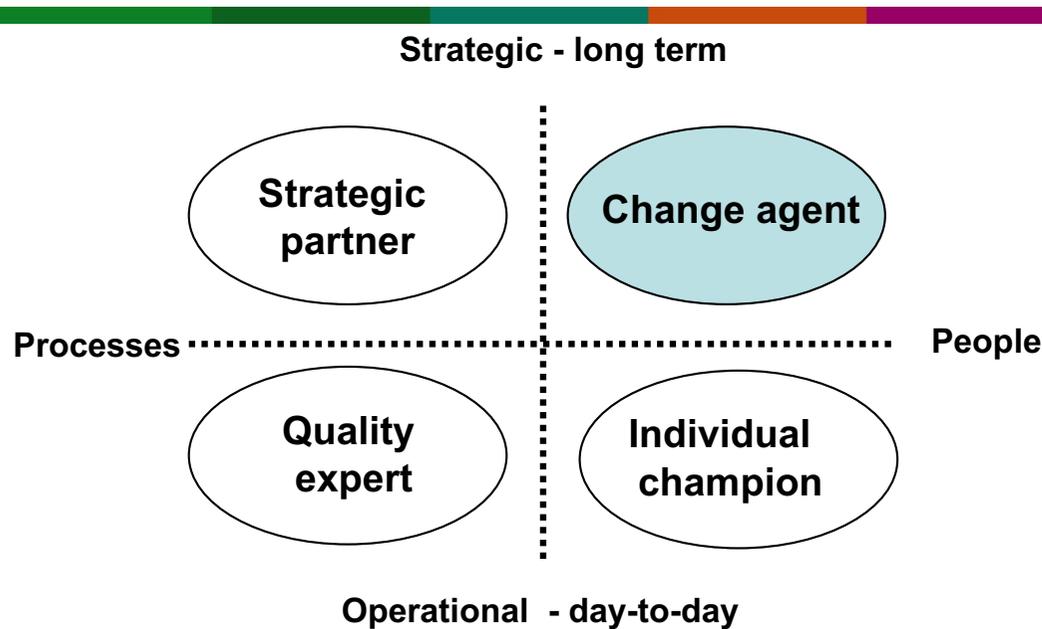

- Connects local R&D practice with (national and local) strategies
- Focussed on key outcomes and deliverables
  - Close to the 'business' and opportunistic
  - Close relationship with decision-makers
  - 'Works with the grain'

## Skills

- Networking at national and regional levels
- Interpersonal skills: collaboration, alliance building
- Political skills ('back stage' and 'front stage')
  - Personal presence and impact
  - Tolerance of ambiguity

**Strategic Partners** to the local organisation and to the wider NIHR/NHS world. Able to sustain a compelling focus on the current and emerging research agenda, and how this is translated into health outcomes.

# Change Agent

## Roles

- Focus on organisation agenda
- Tests hidden assumptions
- Articulates & advocates choices and priorities
- Partner to decision-makers
- 'Goes against the grain'

## Skills

- Personal resilience
- Convening and facilitating groups
- Political awareness
- Balancing advocacy and inquiry
- Prioritisation and personal organisation
- Conflict resolution
- Self-reflexivity

**Agent of Change and Innovation**, the professional body that sustains the distinctive focus on the difference that participation in, and application of, research makes to patient experience and outcome; making innovative change happen with and through patients
